

Before the PTYF

Two years of unemployment and a struggle with clinical depression.

Represents how low my personal skills were before the passport training scheme.

Where I feel I am now.

I feel that the bottles would fill up to the top should I find a suitable job. The year would have made a huge difference to my life, & this is the outcome.

Represents how the same personal skills in the first drawing have increased to a noticeable level. This is where I feel I am at now. I think they would increase further towards the top if I were able to find a suitable job.
